Professional Profile

Informatics Graduate specialized in Full-Stack Software Development and Quality Assurance (QA). Solid trajectory across the complete web application lifecycle, spanning from backend logical architecture and relational database administration (MySQL, Oracle, SQL Server, Microsoft Access) to the design and optimization of responsive interfaces using programming languages (PHP, JavaScript, Java, Python) and UI/UX testing. Analytical professional driven by a passion for technological innovation, code aesthetic consistency, and a commitment to delivering secure, scalable enterprise software aligned with top user experience standards. Highly adaptable with a strong capacity for rapid learning and applying theoretical knowledge effectively in fast-paced professional environments. Capable of working autonomously or collaboratively in multidisciplinary teams with a high sense of responsibility.

Professional Experience

Tester QA | Shark Mind (Ene 2026- Mar 2026)

- Executed exploratory and functional test cycles on "Quick FAQ" and "Safe Pet" applications to detect logical flaws and critical functional bugs.
- Evaluated user interfaces and usability (UI/UX), optimizing mobile responsiveness and proposing actionable layouts to maximize visual appeal and navigation flows.
- Documented and tracked software defects with comprehensive bug reports, accelerating reproduction and resolution cycles alongside the development team

Senior Developer | Independent Full-Stack Development (Sept 2025 – Mar 2026)

- Designed and deployed an independent, custom Full-Stack management system for a wholesale store, building dynamic interfaces with HTML5, CSS3, Bootstrap, and native JavaScript.
- Constructed backend architecture and core business logic in PHP, integrating a secure user authentication system and automated commercial data workflows.
- Modeled and implemented relational databases in MySQL, optimizing SQL queries for stock control under a scalable local environment managed with XAMPP and Composer.

Support Developer – BMGroup (Sept 2023 – Feb 2024)

- Executed Full-Stack optimizations within the .NET framework for mission-critical corporate systems utilized by clients including BCP, Aceros Arequipa, and Trade Marketing.
- Administered databases in SQL Server Management Studio (SSMS), designing and modifying complex stored procedures to ensure data integrity and managing security access controls for platforms like Tigo.
- Developed internal data automation systems for the People division and assisted in operational tech reporting via custom dashboards built in Power BI.

Process and Infrastructure Engineer – Importadora de Ideas S.A. (Feb 2023 – May 2023)

- Managed the end-to-end technical incident ticket lifecycle across multi-site environments and IKM Remanso dependencies utilizing the Mantis Bug Tracker platform.
- Guaranteed operational continuity and perimeter security by supervising IT network infrastructure and ClosedCircuit Television (CCTV) deployments.
- Authored technical procedure manuals to standardize accounting, finance, and import operations while coordinating corporate communication regarding digital culture and cybersecurity

Systems Analyst and Asset Control Manager– Confitería Eli's (Sept 2021 – Dic 2021)

- Designed the operational roadmap for the Point of Sale (POS) system and co-led staff workshops to standardize invoicing, acting as a specialized support channel for the SAP ERP system.
- Administered relational databases in SQL Server and Access across branch networks, overseeing security permissions and auditing CCTV video surveillance networks.
- Designed and executed a comprehensive corporate census for the IT inventory, achieving rigorous control of assets across headquarters and retail outlets

Education

- Licentiate in Informatics (Major: Systems Engineering)– Universidad Mayor de San Andrés

Technical Skills

- Programming Languages: PHP, JavaScript, Java, Python, C#, C++, Kotlin
- Web Development & CMS: HTML5, CSS3, Bootstrap, WordPress, Responsive Design
- Databases: MySQL, Oracle, Microsoft SQL Server, Microsoft Access, phpMyAdmin
- AI Tools & Frameworks: ChatGPT, Gemini, GitHub, Copilot (Code optimization, debugging, and QA automated testing), TensorFlow, Data Science
- Tools & Environments: Git, GitHub, XAMPP, (Apache), Composer, SSMS, Trello
- Infrastructure & Solutions: Biometric Systems, POS, Systems, CCTV Camera Deployment
- Languages: Intermediate English (B2)

Complementary Education & Certifications

Software Development & Version Control

- Kotlin Specialization (Basic & Advanced) | Código Facilito / 20 academic hours.
- Object-Oriented Programming & Python Fundamentals | Cisco Networking Academy.
- Deep Dive into Git & Repository Management with GitHub | Código Facilito.
- Android Camp – Mobile Application Development | Universidad Técnica de Oruro (120 hours).
- UX - User Experience Design Sprint | 6 academic hours.

Artificial Intelligence & Data Science

- *Introduction to Modern AI & AI Fundamentals* | Cisco Networking Academy / IBM SkillsBuild.
- *Introduction to Data Science & TensorFlow for Entrepreneurship* | Cisco Networking Academy.
- *2nd National Congress on Computer Science, IT & Systems (Data analysis with NEO4J, IoT, and Robotics)* | 80 academic hours.

Cybersecurity & Infrastructure

- Introduction to Cybersecurity & Digital Awareness | Cisco Networking Academy.
- Installation & Configuration of CCTV Security Cameras | Colegio de Ingenieros en Electrónica (30 hours).
- Introduction to the Internet of Things (IoT) | Cisco Networking Academy.

Leadership, Management & Academic Projects

- "Misión Transformación Digital 1.0" Program | 64 academic hours.
- Pedagogical & Didactic Training for Teaching Assistants | Escuela Pedagógica Abierta UMSA (400 hours).
- Openinfo Virtual Tech Fair – Development of "Recigalo" Video Game Concept and Conceptual Models.
- Bolivia 2025 Digital Agenda Roadmap Construction Workshop | AGETIC.

Volunteer Work & Community Engagement

- Centro de Salud José Natividad – COVID-19 Vaccination Brigade Volunteer
 - Registered and digitized data from vaccinated patients.
 - Assisted in the verification and auditing of forms during immunization campaign
